Summary

Enthusiastic and self-driven B.Tech student in Computer Science and Engineering (AI & ML). Proficient in C++, Python, SQL, and Data Structures & Algorithms, with a solid foundation in database management and problem solving. Experienced student leader (Head of Sponsorships at ACM SIGAI Chapter). Seeking internship opportunities to apply technical skills and learn in a growth-oriented environment.

Education

Manipal University Jaipur

Aug 2023 – Apr 2027

B.Tech in Computer Science & Engineering (AI & ML) — GPA: 7.72/10, Jaipur, India

Dhruva Public School — High School, Grade: 87%, New Delhi, India

St. Michael's School (CISCE) — Secondary School, Grade: 96.40%, Siliguri, West Bengal, India

Technical Skills

- **Languages:** Python, C++, C, SQL, HTML, CSS
- **Tools:** Visual Studio Code, Jupyter Notebook
- **Libraries/Frameworks:** Pandas, NumPy, OpenCV, TensorFlow, PyTorch, MediaPipe, Django

Certifications

- Cybersecurity Fundamentals — IBM SkillsBuild
- Red Hat System Administration I (RH124 - RHA) — Ver. 9.3
- Red Hat System Administration II (RH134 - RHA) — Ver. 9.3
- Python Essentials 1 & 2 — Cisco Networking Academy
- AI-900: Microsoft Certified: Azure AI Fundamentals

Experience

MUJ ACM SIGAI Chapter

Aug 2024 – Jun 2025

Head of Sponsorship and Curations — Manipal University Jaipur

- Led the sponsorship team to secure partnerships for AI-focused events and hackathons.
- Coordinated with industry professionals, negotiated sponsorships, and managed external communications.
- Strengthened leadership and team coordination skills through event organization.

Projects

AI Lip-Reading System using Deep Learning

- Developed an end-to-end deep learning system to recognize spoken words from lip movements using video input.
- Designed a hybrid CNN-LSTM architecture (ResNet + BiLSTM) to capture spatial and temporal speech features.
- Built a preprocessing pipeline using OpenCV and dlib for facial landmark detection and lip region extraction.
- Trained and evaluated the model using PyTorch, enabling real-time inference via webcam and video input.

Movie Recommendation System using Machine Learning

- Built a content-based recommendation system to suggest similar movies based on user input.
- Applied NLP techniques and vectorization (TF-IDF/CountVectorizer) to analyze movie metadata.
- Implemented cosine similarity to compute relationships between movies.

Achievements

- Selected as one of the top 15 teams in Xypher Hackathon conducted by IEEE.
- School Leader at St. Michael's School, Siliguri.
