

# RUDRAANSH KAUSHIK

+91-90444-29770 | rudraanshkaushik@gmail.com | [GitHub](#)

## PROFILE SUMMARY

Computer Science undergraduate at Manipal University Jaipur with hands-on experience in software development, machine learning, and data analytics. Skilled in Python, SQL, and DSA, with a track record of building AI-based applications and leading technical teams. Passionate about solving real-world problems through data-driven and scalable solutions.

## EDUCATION

|                                                                           |                |
|---------------------------------------------------------------------------|----------------|
| <b>B.Tech — Computer Science Engineering</b><br>Manipal University Jaipur | 2023 – Present |
| <b>Senior Secondary Education</b><br>Army Public School Dhaula Kuan       | 2014 – 2023    |

## TECHNICAL SKILLS

**Languages:** C, Python, Java  
**Core Subjects:** Data Structures & Algorithms, DBMS, SQL, OOP  
**Tools:** GitHub, VS Code, MySQL, WireShark, BurpSuite, VMware  
**Concepts:** Machine Learning, Data Analysis, Image Processing, Problem Solving

## EXPERIENCE

|                                                                                                                                                                                                                                          |                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>Head of Programs — IEEE RAS, MUJ</b><br>– Co-led planning and execution of technical events<br>– Organized workshops, hackathons, and sessions promoting Robotics awareness                                                           | Jan 2025 – May 2025  |
| <b>Internship – Orangutan Technologies</b><br>– Assisted in vulnerability assessments, participating in penetration testing activities<br>– Assisted in identifying security risks and implementing measures to protect systems and data | may 2025 – June 2025 |

## PROJECTS

|                                                                                                                                                                                                                                                                                                    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Plant Disease Detection System</b><br><i>Python · Machine Learning · Image Processing</i><br>– Built an ML-based system to classify plant diseases from leaf images using image preprocessing and classification<br>– Improved early disease detection to assist farmers in crop management     |
| <b>AI Data Analyst</b><br><i>Python · Pandas · NumPy · Data Visualization</i><br>– Developed an AI-powered data analysis system for processing, visualizing, and generating insights from datasets<br>– Built automated dashboards and reports to extract meaningful patterns from structured data |

## ACHIEVEMENTS

|                                                                                                                                             |
|---------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Runner-Up — Hackerz Street 4.0 · IEEE Computer Society MUJ</b><br>– First place in a competitive technical and problem-solving hackathon |
| <b>Runner-Up — DSathon Snatch 2.0 · IEEE Computer Society MUJ</b><br>– Runner-up in data science and technical problem-solving competition  |
