EDUCATION

B.Tech – Computer Science Engineering (Artificial Intelligence & ML), Manipal University Jaipur	2023 – 2027
Senior Secondary & Secondary Education, Kendriya Vidyalaya	2023, 2021

TECHNICAL SKILLS

Programming Languages	Python, C++
Cybersecurity Tools	Nmap, Wireshark, Burp Suite, OpenVAS, Nessus, OWASP ZAP, DVWA, Metasploit
SIEM & Blue Team	Wazuh SIEM, Splunk, ELK Stack, EDR, Firewall Configuration, Log Analysis, Threat Detection, Incident Response
Offensive Security	Penetration Testing, Vulnerability Assessment, OWASP Top 10, Network Security
Cloud & Cryptography	AWS (IAM, EC2, S3), TLS 1.3, Post-Quantum Cryptography (Kyber, Dilithium), MITRE ATT&CK
AI & Automation	Large Language Models (LLM), Ollama, n8n Automation, Python Scripting

CERTIFICATIONS

Google Cybersecurity Professional Certificate	Cisco Networking
Microsoft Azure Cloud Computing	Red Hat Operating Systems
Oracle RDBMS	GeeksforGeeks Data Structures & Algorithms

EXPERIENCE

Cybersecurity Intern – DRDO (Defence Research & Development Organisation)	Jun 2025 – Jul 2025
--	---------------------

- Performed vulnerability assessment and penetration testing using Nmap and OpenVAS, identifying and documenting critical attack vectors across internal systems.
- Deployed and configured Wazuh SIEM for real-time threat detection, security monitoring, and automated alerting across network endpoints.
- Conducted compliance-aligned cybersecurity audit and produced remediation reports, improving organizational security posture.

PROJECTS

SOC AI Analyst Agent – AI-Powered Security Operations Automation	GitHub
---	------------------------

- Engineered an AI-driven SOC automation pipeline simulating Tier-1 analyst workflows using Wazuh SIEM, Python, Ollama (LLM), and n8n; automated alert classification and triage to reduce manual analyst effort.
- Implemented real-time log monitoring with automated MITRE ATT&CK technique mapping and SOC playbook-driven incident response report generation.

Post-Quantum Secure VPN (TLS 1.3 + Post-Quantum Cryptography)	GitHub
--	------------------------

- Architected a quantum-resistant VPN implementing hybrid TLS 1.3 key exchange (X25519 + ML-KEM-768/Kyber) with post-quantum certificate authority (CA) generation.
- Validated end-to-end post-quantum cryptographic handshake integrity using Wireshark network traffic analysis.

Cloud Incident Response & Threat Hunting Lab (AWS + Wazuh + ELK Stack)

- Simulated real-world cyberattacks including brute-force authentication and data exfiltration in AWS.
- Conducted threat hunting and forensic investigation using Wazuh SIEM and ELK Stack; built SOC dashboards mapping attack timelines to MITRE ATT&CK kill chains.

LEADERSHIP AND ROLES

Director of Hospitality, MUJ HackX	Jul 2025 – Nov 2025
Senior Co-ordinator of Logistics, IEEE CS, MUJ	Aug 2024 – Apr 2025
Head Boy, Kendriya Vidyalaya	2022 – 2023

CO-CURRICULAR ACTIVITIES

- Sports Captain, Kendriya Vidyalaya (2021–2022)**
- National Level Swimmer**
